

# See Plants WIN

## Frying Pan Farm Park's 4th Grade Science Educational Outreach Program

What do all plants need to win at life? Find out through this outreach program when Frying Pan Farm Park comes to you. A fantastic way to bring 4th Grade science to life, our excellent interpreters visit your site and deliver a 60 minute program to your class!

 Students will demonstrate their understanding of the structure, functions, and adaptations of plant life as they work in groups to design and construct a model of a plant.

 Each creatively constructed fantastic flora will have the ability to photosynthesize, acquire water, protect itself from predators and the environment, attract pollinators, and disperse its seeds.

 Students WIN at understanding plants, and having fun!

**Time:** 60 Minutes

**Standards of Learning:** 4th Grade Science 4.4, 4.5
